

800 Series Kit

The 800 series kit is the original kit of the RescueVac family of rescue tools. With multiple vacuum tips, RescueVac Safety Relief Valve, and RescueVac Air Knife, the rescuer can quickly deploy the kit and easily switch between tips.

The 8" series kits from RescueVac are the workhorse in the rescue industry. The 8" series can be utilized in collapse, trench and silo incidents to name a few. The 8" series can easily move materials such as bricks, mortar, debris, soils, water sand and gravel.

The RescueVac can transport soil, water, mud, sand, and collapse material from your rescue site 80% faster than traditional methods.

The 8" series kits from RescueVac are the ultimate kit for universal applications.
