

# Liberty Rescue Tube

The Liberty Rescue Tube is designed so first responders can use this device to prevent fatalities that result from victims being trapped in flowing grain. Four vertical interlocking units that form a cylinder which is driven section by section into the grain surrounding the entrapped victim allowing the grain to be removed so the victim can be safely extricated. The Rescue Tube is conveniently packaged so it can be easily moved to the incident site and protected while being stored.

The Rescue Tube includes 4 panels, panel driver, grab bar, utility rope and storage case.
